

Fuganet

Detergent for joints

Use

FUGANET is a detergent specifically designed for the cleaning of ceramic floor and cladding joints (single-fired, double-fired, and porcelain tiles), excluding surfaces treated with wax (terracotta and klinker). It can be used to clean the joints in marble, antique or agglomerated marble floors, provided these are not treated with wax. Unlike other products in its category FUGANET does not contain sodium hypochlorite (bleach) or acidic substances that can ruin the joints or the ceramic glaze.

Instructions

Dilution: the product should not be diluted.

Application:

Spray the product directly onto the joints to be cleaned.

Leave for a few seconds then scrub with an abrasive sponge or scrubbing brush.

Rinse well.

Packaging

500ml bottle with trigger spray;
Box containing 12 bottles.

Composition

Concentrated mixture of water-soluble solvents, thickeners, soap, alkalis, perfume, additives dissolved in water.

Warning

Contains anionic surfactants with a biodegradability over 90%.

Keep out of the reach of children.

Quantities

This will depend on the type of dirt and the type of surface to be cleaned.

Technical Characteristics

Appearance: transparent liquid with an amber tinge.

Odour: Pine

Density: 1.006 kg/l

pH: 11.9
